Testimonial Release Form

Product: **Digestive Science IBS Relief Kit**

Date: 10-19-12

Testimonial Statement:

Although I am only 27 years old I have been suffering from IBS for several years now and have tried many different types of prescription drugs and supplements only to see very little results, so I was amazed at the relief I felt from using the Digestive Science Relief Kit. I noticed a drastic change after just the first week of using the product and now a month later I can go to work and live my daily life feeling more comfortable and confident. Nobody should have to experience the pain and discomfort of IBS and Digestive Science has helped overcome that. I couldn't be more happier with the results and plan to use this product for many years to come.
